

ABSTRACT
HANDLE ASSEMBLY FOR TOOL

A handle assembly for a power tool 1 comprises a housing 2 defining a handle 4 and housing a motor for actuating an output member of the tool, such as a drill bit or jigsaw blade. The handle assembly comprises at least one flexible sheet 8 adapted to be mounted to a surface of the handle of the power tool and having a series of protrusions 10 adapted to be engaged by a hand of a user of the tool. The protrusions 10 retain at least one gaseous vibration damping material such as air between the flexible sheet 8 and the surface of the handle 4.
